# Feedback from Akebono

1) There shouldn't be the gray line above the Akebono logo.

2) **In Mold Identification System:**
   - Mold ID has to be manually filled. When the Mold ID is filled, it should display all the remaining fields.
   - Mold ID has to be on the top. Remaining parameters after that.
   - Change Mold Name to Model Name.
   - Change the GUI so that the user knows which field has to be filled and which field will be from DB.
   - Apart from Mold ID, all the remaining field will be fetched from DB.
   - Make buttons conspicuous. It doesn't look like button now.

   - **Change buttons:**

   - Reset Mold Current Short → Clean Switch
   - Reset Mold Hard Chrome Short → Hard Chrome
   - Reset Custom Mold Physical Specific → Die Change Switch
   - Show This Mold Historical → History of Mold

   - **Functionality of buttons:**
     a) **Clean Switch:** When clicked on clean switch, it takes to Maintenance Control Mold page.
     - Maintenance Control Mold page has 3 buttons.
     - Save: When clicked on save, it resets current short & displays the report.

- Hard Chrome Switch & Save: When clicked on Hard Chrome Switch and Save, it resets Hard Chrome data and Current data/shot and displays the report.
- Die Change & Save: When click on the Die Change & Save, it resets all and displays the report.
  b) **Hard Chrome Switch:** When clicked on Hard Chrome Switch, it shows the report.
  c) **Die Change:** When clicked on Die Change, it shows the report.

3) Status History Display:
- No search by Mold ID.

4) Forecast Setting page missing.
5) Forecast:
- Should have a field/drop down to select the year passed to view the details/report of that year.
- Year in Forecast is dynamic.

6) Clean History:
- When Shot is selected → Header of the trend change to **Shot**.
- When Hard Chrome is selected → Header of the trend change to **Hard Chrome**.
- When Die Change is selected → Header of the trend change to **Die Change**.

7) Temperature & Pressure:
- Show trends
- Graph select by time
